

Our focus - your perspective.

Start your career with us as an trainee

Digatron opens the way to electric mobility with intelligent test systems and computer-controlled equipment for research, production and quality assurance of battery systems. Our test equipment and systems enable the world's leading development laboratories and manufacturers to produce and optimise today's and tomorrow's energy storage systems.

Around 250 colleagues work at locations in Germany, the USA, China, Italy and India to develop customised and precisely fitting solutions for our customers and to be a leading supplier in this market with pioneering technology.

Electronics technician for devices and systems (m/f/d)

WE OFFER YOU

- 30 days holiday
- 37.5 hour weeks
- a great working atmosphere
- a strong and experienced team that will support you in your entry into the professional world
- Preparation courses for the final exams Part I and Part II
- Possibility of permanent employment after completion of your apprenticeship

WHAT YOU CAN EXPECT FROM US:

You will learn pure electronics with us. From the circuit diagram to the circuit board to the finished device with the appropriate software, you will get to know all facets of electronics and control.

In a 3.5-year apprenticeship with us, you will pass through various departments, from production to service to development, and gain a diverse insight into the production and testing processes. In addition to the in-company training, you will also receive school-based training at the Berufskolleg für Gestaltung und Technik (Vocational College for Design and Technology), which is within walking distance of the Digatron complex.

During the apprenticeship, you will learn how to deal with various physical variables and their interrelationships, assemble electronic assemblies, specialise in the use of relevant tools and gain an in-depth understanding of electrical engineering and our products.

You can expect an exciting field of activity, variety and a great environment in which to learn the profession of electronics technician. After successful completion of your training, you will have the opportunity of permanent employment with Digatron.

WHAT YOU NEED TO BRING TO START AN APPRENTICESHIP WITH US:

You have at least an intermediate school leaving certificate with good grades, have obtained a technical college or university entrance qualification or have attended a technical college.

You are technically interested, motivated, like to tinker and can work in a concentrated and independent manner.

We are an internationally oriented company, so you should also have a good command of English.

Send us your application documents by e-mail to jobs@digatron.de. If you have any questions, please contact Ms Annika Schricke at +49-241-168-2411 or the above-mentioned e-mail address.
